NURSING PROCESS FOR THE RN: 4723-4-07 Ohio Administrative Code

ASSESSMENT – In an accurate & timely manner

- Collect objective and subjective data from the resident
- RN may direct collection of data to LPN
- Document the data in the medical record
- Report collected data to other members of the health care team

ANALYSIS – In an accurate & timely manner

- Interpret relevant data
- Analyze data
- Establish, accept, or modify a nursing diagnosis, used as basis for plan of care (nursing diagnosis = identification of client’s needs or problems amenable to nursing interventions)

PLANNING – In an accurate & timely manner

- Develop, maintain or modify the nursing plan of care, including outcomes & interventions
- Communicate the plan of care, with all modifications, to appropriate members of the health care team

IMPLEMENTATION – In an accurate & timely manner

- Executing current valid order or regimen, & the nursing plan of care
- Provide direct nursing care
- Assist with nursing care
- Directing or delegating nursing tasks, as indicated
  Delegation = transfer of responsibility for performance of selected nursing activity or task from licensed nurse to non-licensed person. Direction = Communicating a nursing plan of care to LPN

EVALUATION – In an accurate & timely manner

- Client response
- Document & communicate
- Progress toward expected outcomes of plan of care
- Reassess/revise
- Communicate to members of health care team
NURSING PROCESS FOR THE LPN:  4723-04-08 Ohio Administrative Code
